Ms. Sarah Bennett
Grant Coordinator
The Earthwise Foundation
342 Conservation Drive
Seattle, WA 98104

Dear Ms. Bennett,

I am writing on behalf of the Green Futures Initiative, a non-profit organization dedicated to promoting sustainable urban development and environmental education within the Seattle area. We are reaching out to express our interest in applying for the Urban Greening Grant Program, as advertised by The Earthwise Foundation, with the intent to secure funding for our upcoming project, “Seattle Green Spaces Revival”.

Our project aims to transform underutilized urban areas into vibrant, eco-friendly spaces that serve the community by enhancing biodiversity, providing recreational areas, and educating the public on environmental sustainability. We believe that our initiative aligns closely with the Earthwise Foundation’s mission to support projects that contribute to environmental preservation and community well-being.

The “Seattle Green Spaces Revival” project is designed to:

Copyright @ **EXAMPLES.COM**

Increase green coverage in urban areas through the planting of native trees and the creation of micro-parks.
Implement sustainable landscape designs that promote water conservation and reduce urban heat effects.
Develop educational programs for schools and community groups, focusing on environmental stewardship and sustainable living practices.
We are seeking a grant of $50,000 from The Earthwise Foundation to cover the costs associated with landscape materials, community workshops, and educational materials. This funding will be instrumental in enabling us to launch the project by spring 2024 and to make a lasting impact on the Seattle community.

We are prepared to provide a detailed project proposal, including a comprehensive budget, project timeline, and anticipated outcomes, should The Earthwise Foundation express interest in our project. We are also open to discussing any potential collaboration or adjustments to our project plan to better align with the Foundation's goals and funding priorities.

Thank you for considering our letter of intent. We are excited about the possibility of partnering with The Earthwise Foundation to create a greener, more sustainable Seattle. We look forward to the opportunity to submit a full proposal and are available for any further information or discussions as needed.

Sincerely,

Elijah Thompson
Director, Green Futures Initiative
