

# Patch Management Flow Chart

**KEY**

**PM1\***: Monthly PMs have operations for each type of device (e.g., 421-4, 421-5, 351-6, etc.). There are eight different PMs: relays, HMI, RTU, Telecom, PACS, meters, TLT, and EACMS. This is set to 28 days.

**PM2\*\***: This is used to create operations for the FPC to review the patch notifications. This is set to 28 days.
