

Safety Program Outline

Guidance Concerning The Components Of Our Safety Program

Fundamental Components
<i>Principles contained in these items are the foundation of our safety program. Nothing is to be left out; nothing is to be considered too obvious to be left unsaid.</i>
<ul style="list-style-type: none"> • Comprehensive Safety Manual • Certificate Training Classes (i.e. OSHA 10-Hour, Confined Space) • Company Training Classes (Foreman Training Seminar) • Employee Orientations
Supplemental Components
<i>These items reinforce the more important fundamental principles, as well as facilitate the assessment of our overall safety program for purposes of continued development and improvement.</i>
<ul style="list-style-type: none"> • Foreman Meetings • Tool Box Talks • Site Inspections • One-On-One Meetings
Last Line of Defense Components
<i>These are “Top 10” types of principles and information. The information contained herein should be readily available to all employees on-site, and these critical safety principles should be the first things on an employee’s mind as they begin their work.</i>
➤ <i>Critical Safety Principles</i>
<ul style="list-style-type: none"> • Job Hazard Analysis Worksheets • Excavation Permits • Confined Space Permits • Daily Jobsite Inspections
➤ <i>Critical Information</i>
<ul style="list-style-type: none"> • Site Specific Safety Contact Information (i.e. driving directions to local hospital, local police phone number, etc) • Operator & Laborer Equipment Certifications • Material Safety Data Sheets • Site Specific Safety Guide
