

Draft work schedule for developing the VDI 3805 based standard

Draft Work schedule

10/2010	Installation of a Working Group “Product Data for Building Services Plant Models” in ISO TC59/SC13	At the ISO TC59/SC13 meeting in Pretoria
By 12/2010	Kick off meeting of WG	Possibly in conjunction with WG10 meeting on Object Libraries, in Europe
06/2011	First WG draft of the overall Parts (see architecture document)	
06/2011	IDMs for one or two selected product groups (see architecture document)	
12/2011	Committee Draft ballot of overall Parts	
12/2011	Committee Draft ballot of selected product groups	
06/2013	IS of overall Parts	
12/2013	IS of important product groups (to be selected in 2011)	If not all product groups of VDI 3805 can be covered

Call for experts

We are looking for countries to nominate experts for this standardization project. Particularly, we need

- Experts from building services domains
 - o to support the work on the product group specific Parts
- Experts in the area of computer science, in particular modeling (of Building Services devices), geometrical representation and CAD systems, as well as modeling of programming language constructs in meta languages
 - o to support the work on the overall Parts
