

Technip's goal is to be a leader in the energy industry by providing excellent quality during project execution. Technip is committed to provide its clients the best value project management, products and services while protecting its employees and the environment in which they live.

## Scope

This policy applies to all Technip entities.

## Policy

**It is the responsibility of Technip management to demonstrate the necessary commitment and leadership to create a culture of high quality standards and continuous improvement:**

- Each manager, supervisor and employee is responsible for complying with requirements and meeting Technip's quality standards and is accountable for his or her individual performance and the performance of those working under his or her supervision
- Technip shall ensure that all contractors apply quality standards which are fully compatible with those of Technip
- Technip shall provide adequate resources and training to ensure work is carried out safely and professionally
- Technip shall ensure that all Quality incidents are fully notified, investigated and that corrective action is carried out and communicated across the business
- Technip shall ensure that a comprehensive program of reporting and audits is developed to measure Technip's performance against set goals and objectives, and that these are formally reviewed by Technip management to ensure the effectiveness of the quality management system

**The Technip Quality Management System shall be 'hands on', focused and based on the following five principles:**

- Focus on operational tasks
- Do it right first time
- Assess risks and prioritize resources accordingly
- Knowledge Management is shared and accessible
- Empowered and accountable quality team
