

Quality Policy

Golledge is one of the leading suppliers of frequency control products to the global electronics industry. Our customers rightly expect the very best from us. We strive to offer:

- Products that are renowned for quality and reliability
- Service that is second to none
- Prices that are always competitive.

We are a dynamic organisation thriving on change, and committed to continual improvement and achieving zero defects in all areas.

We value lasting relationships with both customers and suppliers that are based on shared opportunity, mutual respect and trust.

We operate in a profitable, professional and ethical manner so as to provide security and prosperity for our employees and their families. We take our responsibility as members of our community seriously, and give regularly to charity and other local good causes. We monitor and work hard to reduce our impact on the environment.

The quality requirements of our business comply with those of ISO9001, including the commitment to satisfy all external regulatory and internal compliance requirements.

This Policy is reviewed regularly, and updated if required, to ensure Quality Objectives are set which meet the needs of all Golledge Electronics' stakeholders. It is communicated to all Staff through Induction Training (and on up—issue) and is always available for reference on the Company's Intranet. It is available on request to any other interested parties.

Jonathan Golledge
Managing Director
