

Debt Load Worksheet

Tips:

- 1.) Determine exactly how much you currently owe. Use the space below to list all outstanding debt, including credit cards (including storecredit cards), and all loans, including car loans, mortgages, personal loans, and student loans.
- 2.) If you can, make at least the minimum payment each month on each debt to avoid late fees and interest rate increases.
- 3.) If you are able to commit extra income to accelerate your debt repayment, add it to the debt with the highest interest rate.
- 4.) When one debt gets paid off, use the money you were using to pay that debt to increase the monthly payment on another debt.

Debt Load Worksheet
