

APA Referencing Sample Reference List and Bibliography

A **reference list** is the detailed list of references that are cited in your work. Therefore, it includes the full bibliographical information on sources, so that the reader can identify and then locate the source. A **bibliography** is a detailed list of references but also includes background readings or other material that you may have read but not actually cited. Different courses may require just a reference list, just a bibliography, or even both. It is better to check with your tutor first. Both the reference list and the bibliography are located at the end of the work. When using the APA style of referencing, both the bibliography and the reference list are arranged in alphabetical order by the author's surname, or title (for when there is no author).

Sample Reference List

Banerjee, A., & Watson, T.F. (2011). *Pickard's manual of operative dentistry* (9th ed). Oxford: Oxford University Press.
