

# Business Requirements Document

Feature	Definition	Requirement Shopping
<b>Standard based and interoperable messaging protocol</b>	Messaging protocol must be based on industry standards to enable interoperability	
<b>Send Only</b>	Also called Push MEP is simple one-way messaging where a message is sent with no expectation response.	
<b>Receive only</b>	Also called Pull MEP is a message pattern where a non-addressable sender supports the ability to explicitly obtain messages from another application. This can be used for exchanges	
<b>Request/Response exchange</b>	Message pattern consists of one or more request/response pairs. The correlation between request and a response is well defined. In this response maybe deferred and the requesting application may or may not block application processing until a response is received	
<b>Diagnostics</b>	Authentication, diagnostic, logging & routing information should be included in the message and not the payload	
<b>Reliability</b>	Protocol capability to support assured and single delivery to the receiving application with no loss
