## Narrative Report Card 2014-2015 School Year

**Name of Student:** Jane Doe

**Level:** Lower Elementary, 2<sup>nd</sup> Grade

**Reporting Period:** September 3, 2014 – June 5, 2015

### LANGUAGE ARTS

Jane has made amazing progress last trimester in Language Arts. Jane is now confident in writing freely and writes paragraphs independently. In addition to our class readings, which are above her grade level, Jane works on a grade level workbook to ensure she has a strong foundation for more advanced reading. Jane is always eager to participate in class discussions and has a very strong voice and presence in the group. I appreciate the fact that she always speaks her mind and take a stand even if it goes against the majority. I would like to see her continue to grow in her writing and build up to multi-paragraph writing.

### MATHEMATICS

So far during the 2015 school year, Jane has learned:

- Solving variable equations by adding & subtracting
- Roman numerals (I – C)
- Expanded notation
- Long division
- Long multiplication ( up to 6-digits by 3-digits)
- Fractions (with the same and different denominators)
  - Adding
  - Subtracting
- Decimals
  - Addition
  - Subtraction
  - Multiplication

- Word problems

Jane's speed and accuracy have improved tremendously this year. Jane is doing very well, and she has been working hard and keeping up with the older group. I enjoy having her in my class.

## **SCIENCE**

Jane did an exceptional job last trimester learning about the simple machines. She successfully completed several experiments that investigated friction, pulleys, levers and screws vs. nails. In addition, she designed her own invention that incorporated several simple machines, which she presented to the class. Because Jane is so passionate about science it was sometimes hard for her to let others take a turn in class experiments. This is something I worked with her on and she has shown a lot of improvement in this area.

## **HISTORY**

Jane learned about ancient Egypt this year. She is able to articulate why the Nile River was vital in its development, the division of labor and ways of life. Jane was particularly intrigued with Egyptian hieroglyphs and numbers and decoding passages and equation with them. Next trimester I would love to see Jane grow in her ability to analyze primary sources to learn about history.

## **SPANISH**

Jane has an amazing ability in the Spanish language. She has quickly learned Spanish nouns, articles, numbers, colors and has been able to conjugate verbs. She is very smart and likes to participate in class. She does enjoy helping in the classroom as well. She is able to adapt to the curriculum and does understand the concepts of the language.

## **ENRICHMENT**

Jane has participated in Physical Education, Art, Improv, Chess, Cooking, Yoga and Odyssey of the Mind. She has successfully completed these courses and participates in them. Jane is able to stay on task and participates in all of the enrichment classes.

## **SOCIAL EMOTIONAL DEVELOPMENT AND WORK HABITS**

Jane enjoys interacting with her classmates and playing with them at recess and lunch times. On the whole, she is a very excited child that has been able to control her emotions well without getting frustrated. She frequently helps others in class and is very concerned with the well being of others. Jane is better able to discuss conflicts when she has time and space away from other students to quiet herself. Jane's ability to focus on her work is advanced for her age. Jane is

responsive to high expectations and empathy. She is a bright student who finds pleasure in a variety of subjects and activities.
