

# How to write an article

1. Choose a topic from your keyword list
2. Create a short title that includes this keyword. This is like a headline in a sales page or blog post only shorter
3. Decide on your 3 main points in your article. Write 70 – 150 words for each of these 3 main points. If possible use secondary keywords for these main points that relate to the main keyword.
4. Write a headline for these 3 main points as a title for that section
5. Having finished your 3 main points write an introductory paragraph and a concluding paragraph to your 3 main points
6. Spell check the article and edit it to round it off.
7. Your article should be between 250 and 600 words long
