

History of Grenada

John Schultz

Summary of Topic

I am going to write about an island the Caribbean called Grenada and it's history. Grenada is a very interesting country, it has both been British and French and the island has had very many political changes. Grenada is located in southern Caribbean in the Windward Islands. Grenada was first discovered by Europeans in 1498 by Columbus. Grenada was a colony until 1974 when it became fully independent from Britain. Today Grenada is one of the biggest nutmeg exporters in the world and is known as "The Spice of Caribbean".

Evidence

Introduction

Grenada is a very small country in the Caribbean that consists of the main island Grenada, and a smaller island Carriacou. The island is situated in the Southern Windward islands just north of Trinidad and Tobago. Grenada is part of "The Grenadines" which is a group of islands in the southern Caribbean. The main language in Grenada is English, they also have a language of their own with it's origins in the Caribs but it is barley being used.
