

EMAIL ANNOUNCEMENT:

Enhance Patient Care With the NEW *Working Together to Manage Diabetes Toolkit*

Want to make even more of a difference in the lives of your patients with diabetes? Team up with other health care providers using the National Diabetes Education Program's newly enhanced *Working Together to Manage Diabetes Toolkit*. This toolkit was created especially for pharmacists, podiatrists, optometrists, dentists, and other providers like you, who are often the first to see a person with—or at risk for—diabetes.

Your FREE toolkit includes the following:

- ☐ Comprehensive, easy-to-use guide
- ☐ Customizable PowerPoint presentation
- ☐ Downloadable fact sheets and checklists for patient education (in English and Spanish)

When you use the toolkit in your practice, you'll become better at recognizing the early danger signs of diabetes, decreasing the risk of complications, and managing medication therapy.

Access and download your free *Working Together to Manage Diabetes Toolkit* at www.cdc.gov/diabetes/ndep/ppod.htm.
