

the human body
we are embodied insects our bodies are more
represented

... the structure of the brain reflects its history:
as an evolving dynamic system, in which
one part evolves out of, and in response to,
another." I.M.

through the cerebral hemispheres should
co-operate, they have for some time been
in a state of conflict." I.M.

interview with elain McHilchrist

People care to the conversation, about
left brain/right brain assuming that
the left brain is the rational one and the
right brain is somewhat impulsive and
emotional. Left linguistic, Right images.
Every one of these generalizations is
NOT TRUE. All is represented in both sides.

Serial Podcast → "tot" not "boy" Sophie

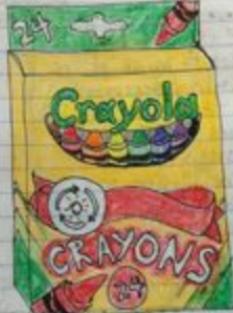

and each hand for brain to understand
different things because
each leather hemisphere
has different functions

Left	Right
see	
pieces	
see it as an inherent sum of points in a sort of digitized way, not so good at seeing things whole and lifelike	whole picture tends to sustain an idea over time and therefore understands flow
	{Generalizations which I.M. doesn't like!}

cool as f***

- yellow
- dandelion
- apricot
- yellow orange
- orange
- red orange
- Scarlet
- red
- violet red
- red violet
- rose
- violet (purple)
- blue violet
- cerulean
- blue
- indigo
- blue green
- green yellow
- yellow green
- green
- white
- gray
- black
- brown

- things I like about
crayons: reminds me
of my childhood,
- Simple, shiny,
- I don't like: the
"crumbs" and the
inability to be
"crisp"

BRAIN vs MIND 222
