

Visit the Dentist Note Pads

All documents are written at or below the 6th grade level in English
and have been approved by the TennCareSM Bureau

In an effort to increase EPSDT dental services, DentaQuest will provide visit the dentist note pads (50 tear off notes in each pad) to primary care physicians and others for distribution to TennCare members at the time of a medical visit or use as a dental reminder. These pads were developed to serve as part of the EPSDT medical exam, to assist the provider in the EPSDT dental referral, and to ensure that each child is encouraged to visit their dentist regularly every six months because oral health is an important part of the child's overall health and well being.
