

Security Consulting and Design Services

Security Challenges

With so many crimes being reported worldwide daily, facility owners and managers are hard-pressed to find and implement practical, unbiased solutions that will not only secure their environments and protect their assets but will also effectively safeguard their occupants. However, security issues are oftentimes overlooked, delayed or not addressed thoroughly. When considering the amount and diversity of today's risk, this fact is cause for major concern.

Equally challenging is the fact that consulting and designing effective security systems have become far more complicated than ever. Up-to-the-minute knowledge of security methods, equipment and technology, and the vision to foresee future needs is vital in addressing the myriad of threats that exist today. Therefore, partnering with Aon is a practical solution.

Project Experience

Amusement/Special Attractions
Aviation/Rail Transportation

- Ancillary Trade Coordination Through Design and Implementation

Proactive Solutions

Our security professionals have extensive knowledge and hands-on experience in state-of-the-art security technology and methodologies. This translates into benefits our clients can appreciate such as minimizing change orders, reducing installation costs and proactively addressing client concerns before they become a problem, while maximizing security system interoperability, usability and expandability.

Client Focused

Since Aon does not maintain any relationships with equipment manufacturers, distributors or installation companies, we are driven by the client's specific needs and interests. From consultation through installation, we can be your project manager, monitoring all aspects of the implementation and sustaining the integrity of the design. Aon's reputation is built on decades of trust, quality work and client satisfaction. We are team-oriented and reachable.
