

Fleet Management

Fleet management is an option for fleet users from as little as two vehicles to as many as your business needs.

You have the option of having your fleet fully financed and managed or managed only.

Assets that can be fleet managed:

- Cars
- Light Commercial
- Reach Trucks
- Materials Handling

Simple budgeting - fixed monthly repayments and simple invoicing make it easy to plan ahead

Full maintenance - spread even more of your costs, with the option to add servicing to your agreement?

No depreciation risk - with contract hire, the assets never appear on your balance sheet, so there's no writing-down over the years

Options include:

- Full maintenance /servicing
- Fuel card
- Tyre replacement
- Insurance.
- Road Tax
