

MATH 553 PROJECT EVALUATION SHEET

There are a total of 100 points possible for this project. 50 of these points the group will share, the other 50 are awarded to each individual. The project total score is worth 20% of your grade.

1 Group Evaluation

Evaluate the group project presentation in the following ways:

_____: (15 points) Was the content of the presentation factually correct?

_____: (15 points) Evaluate the mathematical depth of what was presented.

_____: (10 points) Was the presentation audience appropriate, was there enough context to what was presented given, and did it meet time limitations?

_____: (10 points) Overall impression of creativity, success of presentation, and preparation.

_____: Total shared group score.

2 Individual Evaluation

Please see the Project Summary sheet for more information about these questions.

_____: (50 points) How well did you answer the following questions:

1. Briefly summarize your project?
2. In what way did this project teach you something you didn't know, and what was that thing you didn't know but learned? If you didn't learn anything or found this experience to be a waste of time, how could the project requirements change so that you would?
3. Attach an outline of your presentation.
4. Describe each person's specific contributions to the project: what did each person do?
5. Based on what you produced, what grade should you get?
6. Where did you experience the most difficulty?
7. Add any other comments you'd like me to consider.
