

MSc in International Financial Markets Analysis

This programme equips students with all the skills they need to be a professional financial markets analyst. We closely track the Chartered Financial Analysis (CFA) material in order to prepare the students for passing the first level of this globally-renowned qualification, and go further by immersing them in cutting-edge financial technologies and databases, while also developing their critical thinking in finance skills.

The MSc in International Financial Markets Analysis provides preparation for the CFA level 1 certificate.
