

Project Discovery and Blueprint

Analyze business needs and define a concrete blueprint to fast track your project delivery and accelerate time-to value.

The Challenge

Project Discovery and Blueprint can help your organizations in the following situations:

- Ensuring you allocate your budget in the best way possible to maximize return on investment
- Receiving stakeholder alignment
- Prototyping and testing your idea before transitioning to development phase
- Guidance with user experience possibilities and incorporating standardized practices into your solution
- Leveraging our leadership and experience to incorporate recommendations into your blueprint

The Solution

Benefits:

- Thorough understanding and resolution that meets your business needs
- Expert guidance on digital capabilities, business components, and best practices
- Optimized user experience and business outcomes

Deliverables:

- Business recommendations document
- Clickable prototype capturing main use cases – Optional add-on
- Solution implementation efforts with informed plan and proposal
- Solution requirement document created together with consultant – Optional add-on

The Approach

We perform a set of predefined, intensive workshops with your stakeholders to achieve the defined deliverables. The list of workshops and content may vary depending on the engagement, including more technical deep dives such as integration landscape, or more business-driven use case analysis and definition. On average we foresee three days of preparation followed by a two-week workshops and two days of result consolidations.

Getting Started

Please contact your account executive to discuss your needs. We will schedule an appointment with a practice leader to work out the best set up for you.
