

Java Software Developer
Kapsch TrafficCom IVHS Inc.
Kingston, NY

Kapsch TrafficCom, a provider of high-performance intelligent transportation systems, is seeking a Java Developer for a contract role.

As a **Java Software Developer** your primary responsibility will be the design & development of mission critical multithreaded applications in Java. Additional areas of knowledge and experience will include; strong object oriented programming concepts and applications, extensive experience in application design, architecture, development and implementation of software projects using object-oriented Java technologies, development of Java based Web Services, SOAP, XML, REST, WSDL, HTTP and development to access database management systems using JDBC. Additional responsibilities will include; providing support on translating technical design specifications into a detailed design document and in the documentation of software design via flowcharts, layouts, diagrams and code comments and in software support, maintenance, updates and enhancements for developed software.

The successful candidate will have a University Degree in Computer, Electrical, Software or System Engineering, Computer Science and a minimum 4 years of experience in developing multithreaded applications to interface with other components using relational databases, file systems, web services, XML, messaging and will have experience in Java integrated development environments such as Eclipse and Netbeans and knowledge of the key concepts of the software development life cycle. Programming with Oracle and/or MySQL and development experience in Toll Collection and Intelligent Traffic Systems is an asset.

If you are a self-starter with excellent communication and analytical skills we encourage you to submit a resume with cover-letter and salary requirements to ktc.us.jobs@kapsch.net. For information on Kapsch TrafficCom please refer to: <http://www.kapsch.net/us/en/ktc/Pages/default.aspx>. We thank all applicants in advance but advise that only those selected for interview will be contacted.

Kapsch TrafficCom is a provider of high-performance intelligent transportation systems (ITS) in the application fields of toll collection, urban access management and traffic safety and security. Kapsch TrafficCom covers the entire value creation chain of its customers as a one-stop shop by providing products and components as well as subsystems as open market products, by integrating them into turnkey systems or by developing end-to-end solutions, including services for the technical and commercial operations of systems.

Kapsch TrafficCom is an equal opportunity employer. All qualified applicants will receive consideration for employment without regard to age, race, creed, color, national origin, ancestry, marital status or sexual orientation, gender identity or expression, disability, nationality or sex.
