

# Website Development proposal for NHRDN – Mumbai Chapter

---

## Project Brief:

Develop a web responsive portal for NHRDN – Mumbai Chapter to provide information about the body, showcase upcoming events and show past events.

Develop a backend where an administrator can change / modify content on the website, monitor registrations, send customized notifications.

## Project Details:

There will be 2 instances of the portal:

- Front End
  - Where users can look at the upcoming events, read more information about the body, view past events, purchase registration.
- Back End
  - A CMS system which will be used to manage the content of the website, download reports, send customized notifications, upload new events and past event information such as photos, videos, etc.

## Technologies:

### Platform

- LAMP (Linux / Apache / MySQL / PHP)

### Backend

- Wordpress

### Frontend

- HTML5 with bootstrap framework
- Customized themes
- Slider
- GA Integration
- FB Pixel Integration
- SEO Crawler Integration

**Server:**

Recommendation

- VPS

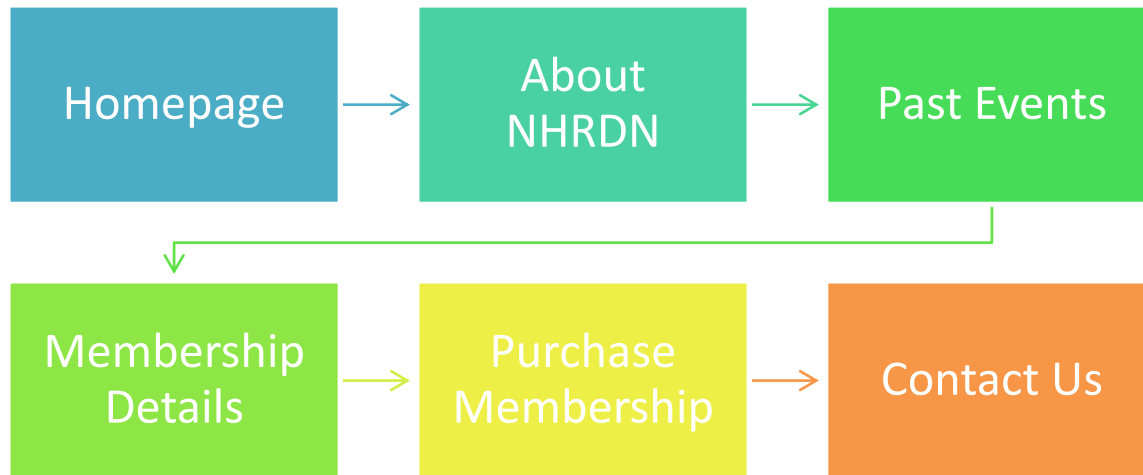

**Front End Pages**

- 1) Home Page  
The homepage will follow a minimalistic design approach where the users will see the list of all the upcoming events.
- 2) About NHRDN & Mumbai Chapter  
This page will show all information about the body and the Mumbai chapter. This page will also have a list of members.
- 3) Past Events  
This page will show a list of all the past events.
- 4) Past Event Details  
This page will have complete coverage of the past event including text, image gallery and videos.
- 5) Memberships Page  
This page will show the details of the membership including the cost of the membership
- 6) Checkout Page  
This will include all the details of the membership including the commercial components such as cost of membership, tax component and coupons.
- 7) Payment Gateway  
This will be the payment gateway page where the user can make the payment through multiple channels.
- 8) Contact Page  
This will be a generic page with a mail form and contact details about the company.

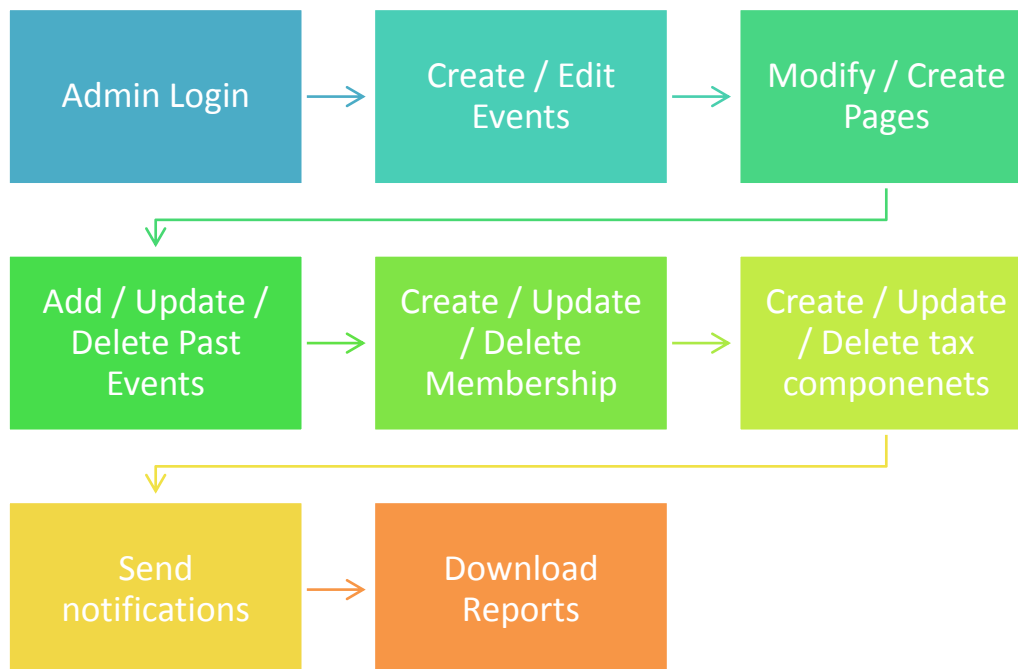

**Backend Integration**

- 1) Create / Update / Delete information
- 2) Create / Update / Delete events
- 3) Create / Update / Delete past events
- 4) Create / Update / Delete Membership Details
- 5) Create / Update / Delete Tax Components
- 6) Create / Update / Delete Notifications

### Frontend Architecture:

### Backend Architecture:

### Timelines & Commercials:

Sr No	Item	Manhours	Cost (INR)
1	Wordpress Developer	120	54,000
2	UI / UX Designer	18	6,300
3	Server Admin	10	3,500
4	Theme		4,830
<b>Total</b>		<b>148</b>	<b>68,630</b>

### Notes:

Cost does not include any 3<sup>rd</sup> party tools, apps, etc.

Cost does not include any escalation in requirements.

Cost does not include hosting.
