

4.4 Rational Numbers

Essential Question How can you use a number line to order rational numbers?

A **rational number** is a number that can be written as $\frac{a}{b}$ where a and b are integers and $b \neq 0$.

$$2 = \frac{2}{1} \quad 0.25 = \frac{1}{4}$$

1 ACTIVITY: Ordering Rational Numbers

Work in groups of four. Order the numbers from least to greatest.

- Use masking tape and a marker to make a number line on the floor similar to the one shown.

- Write the numbers on pieces of paper. Then each person should choose one.
- Stand on the location of your number on the number line.
- Use your positions to order the numbers from least to greatest.

a. $1.25, \frac{1}{3}, 0.5, \frac{5}{3}$

b. $\frac{7}{4}, 1.1, \frac{1}{2}, 1.3$

c. $1.4, \frac{3}{5}, \frac{1}{4}, 0.9$

d. $\frac{5}{4}, 0.75, 0.8, 1.1$

e. $\frac{5}{2}, 0.5, 1\frac{3}{4}, \frac{2}{3}$

f. $\frac{9}{5}, 1.9, 0.7, \frac{2}{5}$

Rational Numbers

In this lesson, you will

- understand that a rational number is an integer divided by an integer.
- convert rational numbers to decimals.

What are some ways to determine which number is greater?

Preparation:

- Cut index cards to make 40 playing cards.
- Write each number in the table on a card.

To Play:

- Play with a partner.
- Deal 20 cards to each player facedown.
- Each player turns one card faceup. The player with the greater number wins. The winner collects both cards and places them at the bottom of his or her cards.
- Suppose there is a tie. Each player lays three cards facedown, then a new card faceup. The player with the greater of these new cards wins. The winner collects all ten cards and places them at the bottom of his or her cards.
- Continue playing until one player has all the cards. This player wins the game.

Key Idea

Rational Numbers

A **rational number** is a number that can be written as $\frac{a}{b}$ where a and b are integers and $b \neq 0$.

Because you can divide any integer by any nonzero integer, you can use long division to write fractions and mixed numbers as decimals. These decimals are also rational numbers and will either *terminate* or *repeat*.

A **terminating decimal** is a decimal that ends.

1.5, 0.25, 10.625

A **repeating decimal** is a decimal that has a pattern that repeats.

$1.333 \dots = 1.\overline{3}$

$0.151515 \dots = 0.\overline{15}$

Use bar notation to show which of the digits repeat.

EXAMPLE 1 Writing Rational Numbers as Decimals

a. Write $2\frac{1}{4}$ as a decimal.

Notice that $2\frac{1}{4} = \frac{9}{4}$.

Divide 9 by 4.

$$\begin{array}{r} 2.25 \\ 4 \overline{)9.00} \\ \underline{-8} \\ 10 \\ \underline{-8} \\ 20 \\ \underline{-20} \\ 0 \end{array}$$

The remainder is 0. So, it is a terminating decimal.

So, $2\frac{1}{4} = 2.25$.

b. Write $\frac{5}{11}$ as a decimal.

Divide 5 by 11.

$$\begin{array}{r} 0.4545 \\ 11 \overline{)5.0000} \\ \underline{-44} \\ 60 \\ \underline{-55} \\ 50 \\ \underline{-44} \\ 60 \\ \underline{-55} \\ 5 \end{array}$$

The remainder repeats. So, it is a repeating decimal.

So, $\frac{5}{11} = 0.\overline{45}$.

Exercises 11–18

Write the rational number as a decimal.

1. $\frac{6}{5}$

2. $7\frac{3}{8}$

3. $\frac{3}{11}$

4. $1\frac{5}{27}$

EXAMPLE 2 Writing a Decimal as a Fraction

Write 0.26 as a fraction in simplest form.

$$0.26 = \frac{26}{100}$$

Write the digits after the decimal point in the numerator.

The last digit is in the hundredths place. So, use 100 in the denominator.

$$= \frac{13}{50}$$

Simplify.

EXAMPLE 3 Ordering Rational Numbers

Activity	Portion of Students
Band	0.14
Chorus	$\frac{3}{25}$
Debate	$\frac{1}{20}$
Gymnastics	0.11

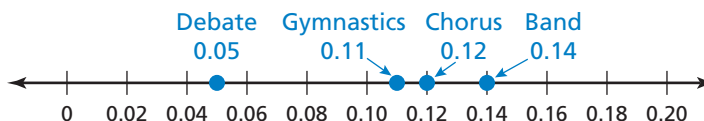

The table shows the portions of students in your grade that participate in four activities. List the activities in order by number of students from least to greatest.

Write each rational number as a decimal.

$$\frac{3}{25} = \frac{3 \times 4}{25 \times 4} = \frac{12}{100} = 0.12$$

$$\frac{1}{20} = \frac{1 \times 5}{20 \times 5} = \frac{5}{100} = 0.05$$

Then graph each decimal on a number line.

∴ The activities in order by number of students from least to greatest are debate, gymnastics, chorus, and band.

42. **OPEN-ENDED** Find one terminating decimal and one repeating decimal between $\frac{1}{3}$ and $\frac{1}{2}$.

Player	Hits	At Bats
Eva	42	90
Michelle	38	80

43. **SOFTBALL** In softball, a batting average is the number of hits divided by the number of times at bat. Does Eva or Michelle have the higher batting average?

44. **PROBLEM SOLVING** You miss 3 out of 10 questions on a science quiz and 4 out of 15 questions on a math quiz. Which quiz has a higher percent of correct answers?

45. **SKATING** Is the half pipe deeper than the skating pool? Explain.

46. **ENVIRONMENT** The table shows the changes from the average water level of a pond over several weeks. Order the numbers from least to greatest.

Week	1	2	3	4
Change (inches)	$\frac{7}{5}$	$1\frac{5}{11}$	1.45	$1\frac{91}{200}$

47. **Critical Thinking** Given: a and b are integers.

a. When is $-\frac{1}{a}$ positive?

b. When is $\frac{1}{ab}$ positive?
