

HOW TO ORDER YOUR DREAM BOARD

CUSTOM SURF SUP:

Bring your ideas to life and ride a board of your dreams. This is the time when you can sit and talk to Ben Tardrew in person over the phone or just by email it is where you can either tell Ben a base outline of the board you are wanting or go into as much detail as you can to really make sure your ideas come to life.

Important info to help you get started:

Ben will ask you a lot of questions though this process so we have made a list of some of the first questions he will ask as this will help get the process started. If you do not know any of the answers this is fine as Ben will help guide you through anything you are unsure of.

- 1: Your height and weight.
- 2: Your skill level.
- 3: What kind of conditions do you surf in and what kind of conditions do you want the new board for.
- 4: Board length
- 5: Board width.
- 6: Boards volume
- 7: Boards outline

Once Ben has a good understanding of what you are after he will get to work and design up what you have asked and once he has something close to finished he will send you some images of your board. This is the time that changes can still be done and together you can go over anything you might like to change.

Once you are happy with what Ben has designed the board will be put into production and we will get it all under way.

Custom RACE:

Bring your ideas to life and ride a board of your dreams. This is the time when you can sit and talk to Ben in person over the phone or just by email it is where you can either tell Ben a base outline of the board you are wanting or go into as much detail as you can to really make sure your ideas come to life.

Important info to help you get started:

Ben will ask you a lot of questions though this process so we have made a list of some of the first questions he will ask as this will help get the process started. If you do not know any of the answers this is fine as Ben will help guide you through anything you are unsure of.

- 1: Your height and weight.

2: Your skill level.

3: What kind of conditions do you paddle in and what kind of conditions do you want the new board for EG: Downwind, Flatwater, Allround.

4: Board length

5: Board width.

6: Boards volume

7: Dugout or flat deck

These questions are just the start and Ben will follow up with many more depending on how involved you want to be in the process.

Once Ben has a good understanding of what you are after he will get to work and design up what you have asked and once he has something close to finished he will send you some images of your board. This is the time that changes can still be done and together you can go over anything you might like to change.
