Credit Card Processing on Totals over \$1000	4%
Hourly 1-4 hours	165.00
Labor hourly 1-4 hours	85.00

# Please Read and Sign Invoice

- Coupons, discounts, and multi-job pricing not applicable for any drain cleaning.
- 30 Day, 1 time only warranty MAY be given if piping is in proper working condition and up to code.
- Camera inspection is required for any warranty on sewer mains.
- All drain cleaning, rodding, and auger pricing good for UP TO 1hr. After 1 hour a charge of \$165/hr will be applied, and option will be given for a re-pipe or repair. If re-pipe or repair is chosen then the initial drain cleaning charge is reduced by 50% with signed agreement and deposit.
- All piping in areas affected by a clogged drain is presumed to be in good condition, up to code, and can withstand normal drain cleaning equipment and procedures. A re-pipe or repair may be necessary before or after drain cleaning service and will be an additional cost.

# Drain Cleaning

Hydro-jetting service (Up to 2 hours)	1050.00
Hydro-jetting service (Each additional hour)	215.00

Add on video inspection	100.00
Add on drain cleaning (1/4" cable)	95.00
Add on drain cleaning (3/8" cable)	185.00

# Sewer Gas Smell

Sewer gas inside the home is usually a combination of methane, ammonia, and hydrogen sulfide. In small amounts the smell is harmless but can get toxic when the gas reaches extremely large amounts of 150 PPM or greater.

Getting rid of a sewer gas smell in your home can be a small DIY fix or a sign that there is a much larger problem.

The best way to tell if it is a small, DIY project is to add plenty of water to EVERY drain in the house. To further ensure the trap seal doesn't evaporate you can add some mineral oil to the drain along with the water.

This includes:

**Both basins of kitchen sinks**

**Both basins of laundry tubs**

**Floor drains in basements and laundry rooms (Sometimes located under the washing machine)**

**Seldom used fixtures like whirlpool tubs**

**Bar sinks**

There are several other common causes for a sewer gas smell that may require more skill.

This includes:

**Dirty tub/shower drains**

**Broken wax seal on 1 or more toilets**

**Full or backed up catch basin**

**Clogged sewer**

**Unsealed sewage pit**

Many times, a sewer gas smell can be a sign that there is a broken pipe somewhere in the house. From a broken sewer line under the concrete floor to a separated vent stack in the attic.

If the DIY solutions do not provide any results, we always recommend a smoke test as the next step.

A smoke test is simple but time-consuming process that involves pumping your homes sewer system with large amounts of harmless smoke. The smoke fills the sewer and venting system. Any breaches in the system will then become visible to the plumbers performing the test and then a diagnosis can be made, and repairs can begin.

**Service Fee to perform visual inspection of homes drains and exposed venting**      **\$59**

**Perform smoke test**      **\$850**

Both fees will be reduced by half if/when repairs are made.

# Leak Inspection

Please Read

A leak inspection is required ANY time there is a leak coming from a ceiling or a wall, and there is no visible, active leak coming from above. Keeley's Plumbing needs to be absolutely sure where the leak is coming from before a diagnosis is given and any repair is performed. The following is what you can expect.

1. Leak inspection fee of \$220.00 per leak will be applied.
2. Expose walls/ceiling to investigate leak and diagnose the problem. Flat rate 1-100 holes.
3. A price will be given for the repair.
4. If agreed upon, the initial cost will be reduced by 50% (\$110.00) and the repair will be completed and tested.
5. If not agreed upon, or if NO PLUMBING LEAK IS FOUND, the \$220.00 balance is due, and an estimate will be left behind.
6. Area will be broom swept cleaned after work is completed.
7. Keeley's Plumbing is not responsible for wall repair.

# Kitchen Sinks

Install customer supplied kitchen faucet (\$8 charge for each supply line)	239.00
Install customer supplied electronic faucet	289.00
Install customer supplied kitchen sink w/ faucet (basic install)	579.00
Install braided SS supply line	159/229
Install customer supplied garbage disposal	289.00
Install customer supplied dishwasher	409.00
Install braided stainless supply line for dishwasher	255.00
Install copper tee and ¼" angle stop	305.00
Install braided stainless supply line for refrigerator 10'/20'	255/295
Re-connect service for new countertops Basic Install	410.00
Replace continuous waste with proper sink drainage	375.00
1 Basket strainer	405.00
2 Basket strainers	420.00
Add-on P-trap or minor tubular repair	85.00
Re-pipe all kitchen sink drainage with new basket strainers	465.00
Lower waste arm and re-pipe all kitchen sink drainage	640.00
Install stainless steel basket strainer	205.00
Remove garbage disposal and replace with basket strainer and minor piping	305.00
Install customer supplied reverse osmosis system	430.00
Cable kitchen sink up to 25' with ¼" cable, up to 1hr.	225.00
Cable kitchen sink up to 50' with ½" cable, up to 1 hr.	290.00
Manually remove blockage from garbage disposal	175.00

Badger 5 1/2 HP:

- 1/2 HP Dura-Drive motor
- Galvanized steel grind components

\$409
