### Synopsis

The UNEM-Filmproduktion nationwide realises promotinal films for small and medium enterprises, trade, crafts and industry since 2006.

The focus of the film production is high quality. Each film production is a solution individually tailored to the customer. The UNEM Filmproduktion provides a complete workflow, which at the end leads to the finished film. From pre-production, i.e. the creation of scripts, and the shooting to finishing in the studio everything is covered. A competent government services, the appropriate pieces of music composition and the use of camera crane, camera car and a harmonious light is self-evident.

The extensive studio services include compositing, bluescreen with an own studio and photo-realistic 3D visualizations. The finished film can be used in all popular presentation formats such as Flash produced for the Internet, DVD, Blu-Ray and celluloid film. The production of animated commercials and promotional films for digital signage systems is offered, as the example of "Local-Monitor" shows. HDTV is a standard for the UNEM Filmproduktion as along with professional speakers and actors.
