

## Frog Food Chains!

Find out which predators eat the common UK frog and which animals the frogs prey on. Display findings as a food chain or simple web.

Note: Feathered predators, such as herons and egrets, like a tasty frog or two, as do mammals such as otters. Frogs like to eat a range of small insects, but will also eat smaller frogs. The insects should be introduced as the plant eaters (primary consumers) in this food chain.
