

Create a 7th grade Life Science One Pager

What is a One Pager?

A One Pager is a way to visually share Key ideas and information from what you have learned. When you create a One Pager, you are trying to use both visual symbols and important words to clearly and concisely share your most important takeaways with someone else.

Examples of One Pagers:

Directions for One Pager for Life Science:

1. You could do a One Pager about Ecology, or about the Ecology since we started remote learning or about your favorite part/unit of Life science or about all of Life science this year. You have many choices.
2. On the next few pages we have created templates for you to use to organize your ideas or you could create your own template. Have fun with this!
3. Write down key words and visuals for what you felt were key ideas this year about Life Science
4. Send this to us somehow. You could take a picture or create a digital file or something else and then email to us.
5. Make sure you only use the front of the page.
6. We would love to show students next year what Life Science is all about.
