# STAKEHOLDER CONSULTATION REPORT

---

PUBLICATION DATE **05.05.2022**

VERSION **v. 2.0**

RELATED SUPPORT

**TEMPLATE GUIDE Stakeholder Consultation Report v.2.0**

---

This is a report template to be used for filling the information pertaining to Local Stakeholder Consultation and Stakeholder Feedback Round conducted in line with the [Stakeholder Consultation and Engagement Requirements](#).

This document contains the following Sections

[Key Project Information](#)

[Grouped Consultation Information](#)

[SECTION A - Information made available to Stakeholders](#)

[SECTION B - Invitations made to Stakeholders](#)

[SECTION C - Report of the Consultation Process](#)

[SECTION D - Continuous input / Grievance mechanism](#)

[SECTION E - Stakeholder Feedback Round](#)

This template has been revised to aid a consistent interpretation and to better support project developers submitting documentation for certification. Please read the accompanying guide to understand how to complete this template accurately. [TEMPLATE GUIDE Stakeholder Consultation Report v. 1.2](#)

**TEMPLATE GUIDE Stakeholder Consultation Report v. 1.2**

Please delete blue text boxes upon completion

## INFORMATION MADE AVAILABLE TO STAKEHOLDERS

### Preliminary agenda for the meeting

>>

Reception – Signing participants list (8.30am)  
Introduction & Project presentation (9.00am)  
Questions and comments on the project (9.30am)  
Safeguarding Principles Assessment of the project (10.30am)  
Sustainability assessment of the project (11.15am)  
Discussion on grievance mechanism and monitoring of sustainable development impacts (12.15pm)  
Evaluation forms and closure of meeting (12.30pm)  
Cooking demonstration (12.45pm)  
Lunch (13.00pm)

### A non-technical summary of the project

(English Version)

#### **EFFICIENT AND CLEAN COOKING FOR HOUSEHOLDS IN NIGERIA UNDER THE GOLD STANDARD PROGRAMME OF ACTIVITIES (POA) 'ECO\_A\_BURN MULTI-COUNTRY CLEAN COOKING PROGRAMME'**

#### **Introduction**

In most of the countries on the African continent cooking is done on either 3-stone fires or very inefficient traditional cookstoves, consuming a lot of fuel, in particular non-renewable firewood, and charcoal<sup>1</sup>. The high biomass consumption has negative impacts on the environment leading to deforestation and land degradation, Greenhouse Gas Emissions (GHG) emissions, loss of soil fertility and soils reduced ability of water retention. Further, indoor air pollution through health-damaging pollutants while combusting firewood and charcoal result in diseases like e.g. pneumonia, stroke, ischemic heart diseases, chronic obstructive pulmonary diseases and lung cancer.

---

<sup>1</sup> <https://www.who.int/bulletin/volumes/94/3/15-155812/en/>

## **Purpose and technology of the project activity (VPA)**

The purpose of this VPA included under the Gold Standard Programme of Activities (PoA), 'ECO\_A\_BURN multi-country Clean Cooking Programme' - (GS10789), is the dissemination of highly efficient improved cookstoves to urban, peri-urban and rural users (households, communities, institutions, or SMEs) in Nigeria.

Several greenhouse gases (GHG), including carbon dioxide, are produced because of the incomplete combustion of biomass as used in cookstoves. More GHG emissions result from the use of biomass which is non-renewable. ICS improve heat transfer efficiency as compared to the baseline traditional cookstoves, thereby reducing both the amount of woody biomass used by unit appliance implemented and the emission of GHGs.

By using the ICS, the consumers assign and transfer all rights on the carbon credits to BURN Manufacturing Co., the Coordinating and Managing Entity of the PoA and Voluntary Project Activity (VPA) implementer.

ICS are distributed through direct sale/distribution and by a variety of retail outlets across the country to end-users.

## **Target Group and Location**

The target group of the VPA are urban, peri-urban or rural households communities, institutions, or SMEs using non-renewable biomass with a conventional system with no improved combustion air supply or flue gas ventilation system, i.e. without a grate or a chimney, prior to receipt of an efficient cooking stove. The VPA may cover urban, peri-urban and/or rural areas across all the Regions of Nigeria

Though the PoA does not cover the replacement of non-renewable by renewable biomass for the moment, this option may be included later. Hence, this Local Stakeholder Consultation shall be also valid for any cooking technologies replacing non-renewable by renewable biomass.

## **Technology**

A VPA may deploy different ICS models designed and developed by BURN. The ICS models are highly efficient, and the designs consider the local cooking culture in the

project area to ensure that improvements in technology and improved standards of living do not come at the expense of cultural traditions. A VPA may opt to distribute other stove models over time.

### Implementation plan

The project is estimated to start on 06/2022 with the distribution of the first improved cookstoves. It is estimated that a total of 250.000 stoves will be distributed by the end of the first crediting period.

### Carbon credits

Greenhouse gas (GHG) emission reductions achieved through saving of non-renewable biomass (or at a later stage possibly through replacement of non-renewable by renewable biomass) will result in carbon credits following certification rules and procedures.

The revenues from the sale of carbon credits help amongst others to:  
distribute improved cookstoves to a subsidized price affordable for end-users.

- scale up and expand the program, thus reaching a wider range of end-users and generating more jobs.
- further invest in R&D, hence, to produce high quality stoves at lower cost.
- provide a reliable after-sales service.
- sensitize and raise awareness amongst end-users about the benefits and how to use the improved cookstoves.

### **Contribution to Sustainable Development**

Besides reducing GHG emission in line with the United Nations Sustainable Development Goal (SDG) number 13 (Climate Action), this project will also seek to increase other long-term sustainability benefits for the end-users as well as the local environment. Project activities under the PoA are expected to contribute to different Sustainable Development Goals (SDGs) in the following way:

Reduction in end-user expenses related to the purchase of fuel for cooking (in line with SDG 1 'No Poverty').

Time savings both for fuel procurement and cooking, thus more time is available for other tasks, like income generating activities or for growing food (in line with SDGs 1 'No Poverty', 2 'Zero Hunger' and 5 'Gender Equality').

Less harmful carbon monoxide and particulate matter during combustion in households, communities, institutions, SMEs will reduce indoor air pollution and thereby decrease of respiratory diseases, headache and itchy eyes, particularly for women and children who spend lot of their time in cooking activities (in line with SDG 3 'Good health and well-being' and 5 'Gender Equality').

Improved cookstoves cook faster than traditional stoves and use less fuel, enabling children, particularly girls to dedicate more time for education/school instead of for cooking (in line with SDG 4 'Quality Education')

Increased penetration of clean and reliable cooking technologies (in line with SDG 7 'Affordable and Clean Energy') and raising awareness of the related safety, economic, and environmental benefits (in line with SDG 4 'Quality Education').

BURN produces its cookstoves in a manufacturing facility located in Kenya, thus generating hundreds of jobs on the African continent. Other jobs are created for sales, marketing, distribution and monitoring staff. Continuous training results in permanent knowledge transfer to local people. BURN may open in future additional factories or assembly lines across the continent depending on the

demand (in line with SDGs 1 'No Poverty' and 8 'Decent Work and Economic Growth').

Reduced deforestation and forest degradation in the areas where non-renewable biomass is used as a source of fuel. This will contribute to the overall stability of forest ecosystems which support biodiversity, watersheds and soil conditions (in line with SDG 15 'Life on Land').

Economic, social and environmental impacts of the project as per Safeguarding Principles & Requirements

<b>Safeguarding Principle</b>	<b>Assessment</b>
Human Rights	The Project respects internationally proclaimed human rights and is not complicit in violence or human rights abuses of any kind as defined in the Universal Declaration of Human Rights. The project will not discriminate with regards to participation and inclusion.
Gender Equality and Women's Rights	The project activity does not endorse any form of discrimination based on gender. The project will take into account gender roles and the abilities of women and men to participate in the decision/design of the project activity. It will be ensured that both women/women association and men will be invited to the stakeholder consultation so that a representative number of stakeholders of both genders will be present at the local stakeholder consultation meeting.
Community Health, Safety and Working Conditions	The project will not expose the community to increased health risks and is not adversely affecting the

	health of the workers and the community.
Cultural Heritage, Indigenous Peoples, Displacement and Resettlement	The project activity will not have any negative impact on cultural heritage, indigenous people nor will it displace or resettle people.
Corruption	The Project doesn't involve, be complicit in or inadvertently contribute to or reinforce corruption or corrupt Projects.
Economic Impacts	The project will respect all labor rights. No negative economic consequences are expected from the project activity. On the contrary, it is expected that the project contributes to sustainable economic growth.
Climate and Energy	The project will reduce GHG emissions as will be monitored and verified in line with the carbon standard requirements.
Water	The project will not affect natural water patterns/flows or cause any additional erosion and/or water body instability.
Environment, ecology and land use	The project will not have any negative impact on the environment and ecology and will not involve the use of land and soil for production of crops or other products. The release of particulate matters and carbon monoxide are significantly reduced by the introduction of improved (more efficient) cookstoves.

## Summary of economic, social and environmental impacts of the Project

>>

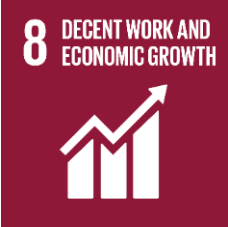

Safeguarding Principle	Assessment
Human Rights	The Project respects internationally proclaimed human rights and is not complicit in violence or human rights abuses of any kind as defined in the Universal Declaration of Human Rights. The project will not discriminate with regards to participation and inclusion.
Gender Equality and Women's Rights	The project activity does not endorse any form of discrimination based on gender. The project will take into account gender roles and the abilities of women and men to participate in the decision/design of the project activity. It will be ensured that both women/women association and men will be invited to the stakeholder consultation so that a representative number of stakeholders of both genders will be present at the local stakeholder consultation meeting.
Community Health, Safety and Working Conditions	The project will not expose the community to increased health risks and is not adversely affecting the health of the workers and the community.
Cultural Heritage, Indigenous Peoples, Displacement and Resettlement	The project activity will not have any negative impact on cultural heritage, indigenous people nor will it displace or resettle people.

Corruption	The Project doesn't involve, be complicit in or inadvertently contribute to or reinforce corruption or corrupt Projects.
Economic Impacts	The project will respect all labor rights. No negative economic consequences are expected from the project activity. On the contrary, it is expected that the project contributes to sustainable economic growth.
Climate and Energy	The project will reduce GHG emissions as will be monitored and verified in line with the carbon standard requirements.
Water	The project will not affect natural water patterns/flows or cause any additional erosion and/or water body instability.
Environment, ecology and land use	The project will not have any negative impact on the environment and ecology and will not involve the use of land and soil for production of crops or other products. The release of particulate matters and carbon monoxide are significantly reduced by the introduction of improved (more efficient) cookstoves.

### Other relevant information to help stakeholders understand the project

>> An explanation of the relevant SDG targets targeted by the project were shared with the stakeholders

SDGs	Targets
 <p>The icon for SDG 1, 'No Poverty', features a red square with a white number '1' and the text 'NO POVERTY' above a white silhouette of a family (two adults and two children).</p>	1.4 By 2030, ensure that all men and women, in particular the poor and the vulnerable, have equal rights to economic resources, as well as access to basic services, ownership and control over land and other forms of property, inheritance, natural resources, appropriate new technology and financial services, including microfinance.

 <p><b>3</b> GOOD HEALTH AND WELL-BEING</p>	<p>3.9 By 2030, substantially reduce the number of deaths and illnesses from hazardous chemicals and air, water and soil pollution and contamination.</p>
 <p><b>7</b> AFFORDABLE AND CLEAN ENERGY</p>	<p>7.1 By 2030, ensure universal access to affordable, reliable, and modern energy services</p> <p>7.B By 2030, expand infrastructure and upgrade technology for supplying modern and sustainable energy services for all in developing countries, least developed countries, small island developing States, and land-locked developing countries, in accordance with their respective programmes of support</p>
 <p><b>8</b> DECENT WORK AND ECONOMIC GROWTH</p>	<p>8.5 By 2030, achieve full and productive employment and decent work for all women and men, including for young people and persons with disabilities, and equal pay for work of equal value</p>
 <p><b>13</b> CLIMATE ACTION</p>	<p>13.3 Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning</p>

## Appropriateness of methods

>> The invitations were sent at least 30 days (1 month) before the meetings date in English and in Hausa and were targeting a wide range of stakeholders to ensure a broad representation and diversified stakeholders opinions. Reminder emails were shared to the stakeholders two weeks before the meetings. Invitation emails were sent on 30/06/2022, at least one month prior to the date of the first meeting (01/08/2022). Email reminders were sent to the stakeholders closer to the date of the LSC meeting.

In summary, the following methods were used to invite stakeholders:

Stakeholders with access to email were emailed an invitation together with a non-technical summary of the project and meeting agenda.

Advertisements were published in local newspaper.

Participants were invited through word of mouth I.e. via invitation letter, phone calls and in person invitation To reach social media users, invitations were posted on BURN's website. The advertisement included the invitation text and the non-technical summary.

Radio Announcements were done In Hausa Language before the meetings.

In section B.1.4 are presented elements to confirm the implementation of the different invitation approaches:

## Gender Sensitivity

>> During stakeholder identification, women groups were identified and representatives from those groups were invited via email and other means of communication referred in section B.1.3. Additionally, efforts were made to extend personal invitations to households where the women were primarily invited. A strong focus was placed on inviting women associations and groups to the physical meeting as seen in the invitation tracking list in section B.1 of this report. In addition, comments were welcomed during the meetings from both genders to ensure the male and female perspective was considered.

## Evidence proving invites took place as stated

>> Email Invitations in Hausa and English

## Local Stakeholder Consultation for Gold Standard Carbon Project Activities(VPAs) 'Efficient and Clean Cooking for h...

Dear Stakeholder,

BURN Manufacturing Co. will implement the Carbon Project activity VPAs: Efficient and Clean Cooking for households in Nigeria' under the Gold Standard Programme of Activities (PoA) 'ECO\_A\_BURN multi-country Clean Cooking Programme'. The PoA is managed by BURN Manufacturing Co. In this context a Local Stakeholder Public Consultation will be carried out for all local, affected and interested stakeholders, including non-governmental organizations, women group research institutes and organizations/individuals working on topics related to the project activity, policy makers on a national and state level as well as for local people, communities and or representatives who are directly or indirectly affected by the project. Please note that this Local Stakeholder Consultation would be also valid for any other Voluntary Project Activities (VPAs) implemented in Nigeria under BURN's Gold Standard PoA 'ECO\_A\_BURN multi-country Clean Cooking Programme', provided that they are homogeneous, i.e. deploy the same stove type(s), target the same end-users and are within the same project boundary.

BURN Manufacturing Co. (Coordinating and Managing Entity of the PoA) invites all interested parties to attend one of the following Local Stakeholder Consultation meetings:

**August 01, 2022, 8:30 am to 13:00 pm in Kano**

Tahir Guest House  
Kano

**August 03, 2022, 8:30 am to 13:00 pm in Kwara**

NCAM, Jimba-Oja community  
Kwara

**August 05, 2022, 8:30 am to 13:00 pm in Jos**

Prestige Event center, 1st Bank Rd, Jebbu, Bassa  
Jos

Stakeholders who cannot physically attend the meeting, have the possibility to participate online through **Zoom**. The login details are the following:

## Pictures from the physical meeting(s) (best practice)

(Local Stakeholders Consultation – Kano, Nigeria)

(Local Stakeholders Consultation – Kwara, Nigeria)

(Local Stakeholders Consultation – Jos, Nigeria)

### Minutes of physical meeting(s)

>> The three meetings were carried out in the same order detailed in the minutes of the meetings below. Participants raised questions and concerns during the three meetings. Please refer to C.3 for a complete list of the questions raised during the meetings and the answers provided by BURN.

### Minutes of the physical meetings in Kano, Kwara and Jos in Nigeria

#### Registration of participants:

Participants who attended physically arrived and were asked to sign the attendance list. The online participants registered before joining the Online Meeting via Zoom Meetings platform.

### **Welcome Remarks:**

Participants in person were welcomed by BURN's team leaders, for all the meetings. Introductions of the present participants were done for both the physical meetings and for the stakeholders participating online. The purpose of the meeting and the agenda were explained to the audience.

### **Project Presentation:**

BURN's staff started the presentation by explaining the project in detail; they presented BURN Manufacturing, the main goals of the program and its benefits for the local communities, as well as the ICS technology involved in the project. They also took time to remind the stakeholders about climate change and its causes, and they briefly explained the theory of the carbon credits, carbon markets and the development of carbon projects. BURN team took some time to explain carefully to the stakeholders that the transfer of rights to the carbon credits generated using the stoves would be transferred to BURN as the Coordinating Management Entity of the entire project. The carbon waiver was demonstrated to be on the strap that wraps the stove box, and by the end user cutting this strap, they would be waiving their claims to any Verified Emission reductions generated using that stove. The purpose for this and the way in which BURN would use the revenues from the sale of the carbon credits was explained clearly in the presentation during the LSC meeting

### **Questions and answers session:**

Stakeholders raised many questions about the price of the ICS and its quality, as well as the expected timeline for the project and the distribution plans. They expressed a lot of interest in the involvement of the communities and more particularly the involvement of women. Stakeholders also highlighted the importance of working with other Collaborators in both the Private and Public Sectors to ensure the Information reaches as many people as possible. All these questions and comments were fully and satisfactorily answered by the project proponents.

### **Presentation of the Safeguarding Principles and Sustainability assessment of the project:**

BURN's staff briefly explained the project's Safeguarding Principles and their assessment. The stakeholders were continuously consulted for feedback and comments, as an open discussion. The meeting continued with a presentation of the

SDGs, and on the positive impacts of the project on a few specific SDGs. Participants agreed with the assessment and didn't have further comments.

### Closure of the meeting:

BURN's staff presented the grievance mechanism which was discussed and agreed by all stakeholders. Also, the next steps regarding project implementation and contact details were shared with participants. The evaluation forms were then distributed to the participants. The team expressed its appreciation to all participants who attended the meeting and who offered many constructive suggestions. Participants were then invited for the demonstration of the project stoves. The meeting closed with the distribution of Lunch.

### Minutes of other consultations

>> N/A

### Assessment of comments from all consultations above

Gender of Stakeholder	Stakeholder comment	Was comment taken into account (Yes/ No)?	Explanation (Why? How?)
M	Is BURN implementing Corporate Social Responsibility Initiatives?	Yes	BURN Manufacturing is currently not implementing any Corporate Social Responsibility, however, strategies are being put in place to support complementing activities within the communities
M	Does BURN promote Commercial and institutional stoves and will they be part of the project?	Yes	BURN does produce and distribute other types of stoves, including commercial and institutional. However currently we are focusing on the domestic stoves.
M	How does BURN work to reaching to all the end users across the Country?		Burn Manufacturing is working across 37 States in Nigeria with a wide network of distributors to reach every potential end user.

M	Are the stoves installed with a Serial number for monitoring	Yes	Every Burn stove have a Unique Serial number which is used to identify every stove. Upon purchase, the end user should register his/her details for traceability.
F	What is the cost of the Stove to the end users. Will the stove price be affordable to the target users which are low income households?	Yes	The subsidy of the end-user price will be made possible through carbon finance and will make the stove affordable.
F	Do the Charcoal stoves use the normal charcoal produced locally?	Yes	Jikokoa stove uses the normal charcoal produced by the locals across the country.
F	What is the lifespan of a Jikokoa/ Kuniokoa? Can the Jikokoa/ Kuniokoa be cleaned easily?	Yes	We have households that have been using them for more than 7-10 years without any problems, but it also depends on if the user respects the mode of use and is performing proper maintenance as per BURNs instruction. Yes, the stove can be cleaned easily.. All the instructions are indicated in the user manual and communicated during the sales process.
F	Will Burn Manufacturing train people on how to Manufacture the stoves locally		BURN manufactures all its stoves in Kenya – Burn Manufacturing in Ruiru- Kiambu. They have centralized its operations for easy operations and hired its staff from within the country and outside in the move to create jobs for the locals and equally ensure the

			quality and continuous research are put in place. Currently is not possible to manufacture the stoves within the local administrative regions of Nigeria but maintenance and repair activities will be performed locally thus creating jobs.
M	How can we recognize a counterfeit from a real Jikokoa?	Yes	All BURN stoves come in their original box with a serial number and a warranty booklet ensuring the quality of the product and the after-sale services. The Jikokoa Classic's warranty period is 1 year and the Xtra is 2 years. In addition, all BURN stoves have Unique Serial Number and are sold by authorized distributors and promoters.
M	How can one be a Burn's Distributor?	Yes	BURN is working with distributors in many countries and welcomes organization that may work as sales partners across the country.
M	Are there plans for Burn Manufacturing to collaborate with the Government and other stakeholders to have a total shift from biomass stoves other cleaner stoves	Yes	BURN Manufacturing will collaborate with the relevant government sectors and other stakeholders in the market to support transition to more clean fuels.  By being part of the clean cooking environment in Nigeria, BURN will stay up to date with the developments of the cooking sector and will participate in all discussions for transition to more cleaner stoves.
F	How will the stoves be purchased in rural areas and how will be the repair process?	Yes	BURN establishes a network of distributors and retailers across all regions to ensure accessibility and purchase of the stoves to all the

			target users. BURN will equally be establishing repair stations across different regions. This will generate Decent Work thus, contributing to Sustainable Development Goals. Registered households with a warranty will have the repair within the warrant guidelines, hence all encouraged to register the stove upon Purchase.
M	Are there plans to extend the Burn Cookstoves to other Regions which are believed to be using a lot of Charcoal and Firewood.	Yes	Burn's project will cover all regions across Nigeria for both Urban, Peri-Urban and Rural Regions, hence extending the stoves to every potential User.
M	How will the subsidy of the end-user price impact the margins for the distributors?	Yes	The margins of the distributors will not be affected by the subsidy of the end-user price as the funding will come directly from the sales of carbon credits. In case of any questions on the distributors' side in the framework of this project, BURN remains available for adapting the distribution plans to the distributors needs.
M	Does BURN as well has Commercial and institutional stoves and will they be part of the project, and if not why and they use a lot of firewood and Charcoal and cook for many	Yes	Although BURN produces and distribute these stoves, currently we are focusing on the Domestic stoves. Commercial and institutional stoves are currently not part of this project. If are introduced in future this will be communicated.
M	Which actions is BURN implementing to raise awareness on the	Yes	Burn is continuously working to provide information and awareness on the impacts of climate change. This is done in all segments of its

	negative impacts of climate change?		operations through trainings, awareness and marketing campaigns, local stakeholders consultations and other means of reaching its main audience
M	Jikokoa uses charcoal while Kuniokoa uses firewood which means that trees are cut down and this contributes to deforestation. How is this project different from others in terms of impacts on the environment?	Yes	Jikokoa uses at least 50% less than the traditional cookstoves, While Kuniokoa uses at least 50% less firewood than the traditional Cookstoves. It is not yet the perfect solution but a step forward, with the long-term goal to replace non-renewable biomass by renewable one. The use of Improved Jikokoa/ Kuniokoa means reduced deforestation and equally reduced Carbon Emissions in the atmosphere hence mitigating the impacts of climate change.
M	Apart from Distribution of Cookstoves, can BURN work on how to equally support the end users with reforestation activities which will help in fighting impacts of climate change	Yes	BURN is currently working on the development of side activities that could contribute to the restoration of forests, on which the community will be informed, once rolled out.
M	How will the stoves be purchased from the rural areas and how will be the repair process?	Yes	BURN has established a network of Distributors and retails across all 37 States, to ensure accessibility and purchase of the stoves to all the Target Users.  BURN has equally established repair stations across the regions. This is equally generating Decent Work contributing to the achievement of Sustainable Development Goal. Registered households using Burn stoves within a warranty period will

			have the repair within the warrant guidelines, hence all users are encouraged to Register the stove upon Purchase. In Addition, BURN is open for more interested distributors and Repair service Providers across the Counties.
F	Are BURN stoves used elsewhere in Africa and in the world?	Yes	BURN stoves are exported to a few other African countries (i.e.: Somalia, Tanzania, Nigeria, Senegal, Mozambique, DRC Ivory Cost), and BURN is currently working on expanding its activities to additional new markets across the continent. BURN stoves are not sold outside the African continent but there are other efficient cooking solutions used in Asia and South America that also have an impact on people's lives.
M	How Burn is doing air quality check while installing the Cookstoves?	Yes	BURN conducts different tests to determine stove efficiency and quality. No specific test is done to check air quality. BURN conduct surveys (either site visits or telephone surveys) to check on the pollution-related inconveniences (such as smoke levels, itchy eyes and breathing problems) in the project scenario compared to the baseline scenario.

### Evaluation forms (best practice)

In total 101 evaluation forms were received. Below is a sample of some meeting evaluations by stakeholders consultation participants. Actual scanned evaluation forms will be shared as attachments to this report.

You may use the table format below to collect feedback on your consultation

Name	Abubakar Bello Muhammad
Gender – Male/Female:	<b>Male</b>
What is your impression of the meeting?	The meeting was good and the presentation and how am educated about it. The project is impressive, economical for the society.
What do you like about the project?	The project makes cooking easier
What do you not like about the project?	Nothing.
Signature	<b>Yes</b>

Name	Fatima Harunia Sani
Gender – Male/Female:	<b>Female</b>
What is your impression of the meeting?	Very impressed about this meeting. Because I used to see the product many times and I did not have interest on it. But today I got many information on the product, I'm impressed and want to be one of the end users.
What do you like about the project?	I Learned a lot today, how safely can cook without smoke then save our health.
What do you not like about the project?	I love everything about this project
Signature	<b>Yes</b>

Name	Maryam Usman Bako
Gender – Male/Female:	<b>Female</b>
What is your impression of the meeting?	This Project is good invention. It helps us to eradicate poverty.
What do you like about the project?	The project will help shed more light on how to maintain good health.
What do you not like about the project?	I like everything about this project
Signature	<b>Yes</b>

Name	Christy Baba Jimeta
Gender – Male/Female:	<b>Female</b>
What is your impression of the meeting?	The meeting was interactive and had exposed participants to knowledge on the need for clean energy by BURN on the aspects of SDGs
What do you like about the project?	The project helps us to manage climate changes & identify the risk involved in the environment.
What do you not like about the project?	None
Signature	<b>Yes</b>

Name	Adedayo Oladayo
Gender – Male/Female:	<b>Male</b>
What is your impression of the meeting?	It's very interesting, encouraging and moreover meeting is informative. Improved cook stoves is a way of mitigating climate change impacts.
What do you like about the project?	I like the project because it made us to know our rights. The product is advanced & Economical moreover time saving device
What do you not like about the project?	I like everything.
Signature	<b>Yes</b>

### Summary of alterations based on comments

>> BURN has considered all stakeholders comments therefore, the project doesn't need further modification.

## CONTINUOUS INPUT / GRIEVANCE MECHANISM

Please use the table below to report on the methods agreed with stakeholders

Method Chosen (include all known details e.g. location of	Justification of Choice (best practice)
---	---

	the book, phone, number, identity of mediator)	
Continuous Input / Grievance Expression Process Book (mandatory)	BURN STOVES NIGERIA LIMITED, Suite 10B JBS Plaza No. 375 Civic Centre Road, Opp. Yan Siminti, Kano State, Nigeria.	Stakeholders agreed to have a grievance book at BURN Nigeria Office. Complaints or any other concerns can be stated and will be filed directly at this office.
GS Contact (mandatory)	help@goldstandard.org	This is mandatory for all GS Projects
Telephone access (optional)	Burn Nigeria Customer Care Line +2347025006000	Stakeholders agreed to have a phone number for quick contact. The phone number of the BURN offices in Nigeria will be made known to all project beneficiaries.
Internet/email access (optional)	norato.xerinda@burnmfg.com Burn: info@burnmfg.com	Stakeholders showed comfort in submitting grievances and inputs through email.
Nominated Independent Mediator (optional)	N/A	N/A
Other	N/A	N/A

## STAKEHOLDER FEEDBACK ROUND

☐ Please check this box if the project is retroactive and has done only 1 consultation with a physical meeting integrated into the SFR.

### Length of the Feedback Round

Stakeholder Feedback Round		Planned	Actual
Start Date	10/08/2022	<input checked="" type="checkbox"/>	<input type="checkbox"/>
End Date	09/10/2022	<input checked="" type="checkbox"/>	<input type="checkbox"/>

### Summarise how all stakeholders were/will be invited to provide feedback

>> All stakeholders (invited and those who attended the Local Stakeholder consultation meetings) will be invited for the Stakeholder Feedback Round. The Invitations will be sent out on 10/08/2022 through Emails, Website and Phone Calls. The Expected closing date will be on 09/10/2022. The information to be made available to stakeholders includes the project Non-Technical Summary, Draft Local Stakeholders Consultation Report, and the Local Stakeholders Consultation Summary Report. The lists of the stakeholders who will be invited to the feedback round are presented below:

**Summarise Feedback received, including if any changes in project design were made**

>> The Stakeholders Feedback Round is ongoing, hence this section will be updated as soon as relevant information is gathered during the process.

## Revision History

Version	Date	Remarks
1.2	5 May 2022	Addition of grouped consultation info, preliminary agenda and section to justify retroactive consultation took place. Minor edits to text.
1.1	14 October 2020	Inclusion of Key Project Information Restructure, new headings and reorder to better match the steps a developer will follow in consultations. Removal of some non-mandatory template tables (Blind Sustainable Development Assessment). Clarification of best practice steps that are non mandatory processes, clarification of mandatory discussion points. Clarification regarding publishing names and that original evaluation forms (optional) and attendance lists (mandatory) should be separate documents. Improved clarity on Stakeholder Feedback round section and procedures for retroactive projects Provision of an <a href="#">accompanying Guide</a> to help the user understand detailed rules and requirements
1.0	14 August 2017	Initial adoption
