

## **Scripting and Storyboarding for People's Collection Wales.**

Use this template to plan a video about a topic you'd like to discuss. Collect the information you need to tell your story, and any items that you'd like to photograph and display on the website alongside your video. Then create a story plan! See 'Storyboarding the Saturnalia Film' to see an example!

### **Story plan.**

The story plan will include all the topics you want to cover in the video. It can also include a list of possible scenes, and lines to say in those scenes. The students can decide what happens in each scene and also write a script, either by using suggested lines, or creating a script for each scene from scratch.
