

## **APA Reference Style**

### **Citations in Text**

In-text citations include the author and date, either both inside parentheses or with the author names in running text and the date in parentheses.

- After the intervention, children increased in the number of books read per week (Smith & Wexwood, 2010).
- Smith and Wexwood (2010) reported that after the intervention, children increased in the number of books read per week.

**\*Note the use of "&" when both author and year are inside parentheses, while "and" is used when only the year is in parentheses.**

For multiple citations within parentheses, [alphabetize the studies](#) as they would [appear in the reference list](#) and separate them by semicolons.

- Studies of reading in childhood have produced mixed results (Albright, Wayne, & Fortinbras, 2004; Gibson, 2011; Smith & Wexwood, 2010).

### **Use of Et Al.**

Below is a chart showing when to use et al., which is determined by the number of authors and whether it is the first time a reference has been cited in the paper. Specifically, articles with one or two authors include all names in every in-text citation; articles with three, four, or five authors include all names in the first in-text citation but are abbreviated to the first author name plus et al. upon subsequent citations; and articles with six or more authors are abbreviated to the first author name plus et al. for all in-text citations.

Number of authors	First text citation (either parenthetical or narrative)	Subsequent text citations (all)
One or two	Palmer & Roy, 2008	Palmer & Roy, 2008
Three, four, or five	Sharp, Aarons, Wittenberg, & Gittens, 2007	Sharp et al., 2007
Six or more	Mendelsohn et al., 2010	Mendelsohn et al., 2010

- Authors - Family Name and initials, with space between initials in given Names
- Initials have full stops.
- Multiple authors separated by a comma
- Use "&" before last author with preceding comma
- Use "(Ed.)" or "(Eds.)" to denote editors
- List only up to 7 authors. If more than 7 authors, list first 6 authors, then ellipses followed by the last author.

- Article title in sentence case, but initial caps for first word after colon
- Journal titles are written in full
- For editions, use “(2nd ed.)”, “(3rd ed.)”, and so forth [follow existing journal style for superscripting of ordinal indicators]
- Page ranges are written in full
- For page ranges and page count, use “p.” for single page and “pp.” for multiple pages and page ranges
- Formatting: journalTitle and bookTitle in italics. Volume in italics as well. As a general rule, for non-journal or book references where there appears to be 2 titles: one appearing to be a part of the other larger body of work, set the larger body of work in italics. In this case, italic tags will need to be added, as only journalTitle, bookTitle, or bookSeriesTitle will be formatted by the template.

### Examples

<b>Journal Articles</b>		<b>Author(s). (Publication year). ArticleTitle. Full JournalTitle, volume(issue), pages.</b>
One author	Fawcett, T. (2006). An introduction to ROC analysis. <i>Pattern Recognition Letters</i> , 27(8), 861–874. doi: 10.1016/j.patrec.2005.10.010.	Issue number is optional. Use issue only if each issue starts at page 1. If pagination is continuous within volume, use volume only.  Do not add punctuation after dois and URLs.
2 to 7 authors	Daley, C. E., & Nagle, R. J. (1996). Relevance of WISC-III Indicators for assessment of learning disabilities. <i>Journal of Psychoeducational Assessment</i> , 14(4), 320–333.
