

ESSAY:

Introduction:

Hook: Many schools scramble to decide if they want students to wear uniforms to school, or let the students choose what they want to wear to school.

Background information: Some students like uniforms and some don't, we can't blame them for that, they have their own reasons. But affording them, will always be a problem when it comes to uniforms. No one knows if you can afford the uniforms that the school is giving.

Thesis: I don't think kids should wear uniforms to school because they have to wear the same clothes as everyone else, some students might not be able to wear uniforms, and uniforms could be expensive.

Body Paragraph 1:

Point 1 Assertion: If schools require uniforms, the students would have to wear the same thing as everyone else.

Point 1 Evidence 1: Some students might not like wearing the same clothes as everyone else.

Point 1 Explanation 1: It would feel awkward to wear the same thing as everyone else. Being twins with everyone... doesn't sound good. I know girls and boys will have different things to wear, but still, it would be awkward to wear something everyone else is wearing.

Point 1 Evidence 2: Schools have to make the same type of uniform for everyone.

Point 1 Explanation 2: I'm pretty sure making the same uniform for everyone, would cost lots and lots of money, so getting uniforms would be a waste.

Body Paragraph 2:

Point 2 Assertion: Some students might not be able to wear the uniforms.

Point 2 Evidence 1: Some students might not feel comfortable wearing their uniforms.

Point 2 Explanation 1: For example, shorts, or skirts. Girls may not be comfortable with wearing skirts. It is possible and you can't force them to do that. And we don't want students going way out of their comfort zone. It just might feel weird for them.

Point 2 Evidence 2: Some students may not be able to wear uniforms because of their religion.

Point 2 Explanation 2: students might not be allowed to wear uniforms, maybe some students might not be able to wear skirts or shorts, because their religion won't let them.

Body Paragraph 3:

Point 3 Assertion: Uniforms can be expensive for some students

Point 3 Evidence 1: Some student's parents might not be able to afford the uniforms.

Point 3 Explanation 1: If something like that happens, it would be hard for them to get a uniform, especially since it's required.

Point 3 Evidence 2: It is possible for schools to make uniforms a little expensive so they can get more money.

Point 3 Explanation 2: That would just be terrible, a lot of people are just wasting money on uniforms instead of wearing their own type of clothes that are way cheaper.

Conclusion:

Summary of main points in different words: So this is why Uniforms should not be required for schools. I'll repeat it again: Wearing the same clothes as other people, won't be liked by many students, it is possible for some students to not be allowed to wear uniforms, and some people won't be able to afford it, or it'll be too expensive.
