

How to Cite: AMA or JADA Style

The *Journal of the American Dietetic Association* follows the American Medical Association style for references. One exception is that reference citations in JADA must list *all* authors' names; use of "et al" is not acceptable. Abbreviate periodical titles according to *Index Medicus*; (<http://www.nlm.nih.gov/tsd/serials/lji.html>) If a title does not appear in *Index Medicus*, provide the complete title. For more complete coverage, please consult the AMA Manual of Style: A Guide for Authors and Editors. (Ref R119.A 533 1998). Numbers in parentheses refer to section of the AMA Manual.
