Additional rules	
	Reference List
Exact quotes	Put quotation marks around a direct quote that is less than four lines. If the quotation is more than four lines, the quote should be set off in a block, in reduced type, and without the quotation marks. Use a citation format appropriate to the quoted work.
Secondary citations	<i>Citing a source from a secondary source is generally discouraged, since authors are expected to have examined the works they cite. See library staff for assistance in locating original works. If an original source is unavailable, however, both the original and secondary source must be listed. The example below is a journal cited in a journal.</i> Author AA, Author BB. Title of article. <i>Abbr Journal Title</i> . Year;Volume(Issue):Page-Page. Cited in Author AA, Author BB. Title of article. <i>Abbr Journal Title</i> . Year;Volume(Issue):Page-Page.

	Cauley JA, Lui L-Y, Ensrud KE, et al. Osteoporosis and fracture risk in women of different ethnic groups. <i>JAMA</i> . 2005;293(17):2102-2108. Cited by: Acheson LS. Bone density and the risk of fractures: should treatment thresholds vary by race [editorial]? <i>JAMA</i> . 2005;293(17):2151-2154.
No date	Use citation format appropriate to work. Example below is a website.
	Smith J. Gvu's 10th WWW User Survey. Gvu's WWW User Surveys Web site. http://www.gvu.gatech.edu/user_surveys/survey-1998-10/ . Date unknown. Accessed January 4, 2012.

How to Format/More Rules

- Begin your reference list on a new page headed *References*. References should be listed in numerical order at the end of the manuscript (except for personal communications). References should be single spaced and are not indented. See the example below:
 1. Goldstein P. *Copyright's Highway: From Gutenberg to the Celestial Jukebox*. Rev ed. Stanford, CA: Stanford University Press; 2003.
 2. Mishkin B. Urgently needed: policies on access to data by erstwhile collaborators. *Science*. 1997;270(5238):927-928.
- In the text, citations should be numbered with superscript numbers and then listed consecutively at the end of the manuscript.
- Use superscript numerals *outside* periods and commas, and *inside* colons and semicolons.
- For all types of references, there is no comma between the last name and first initials of the author.
- When referencing journals, abbreviate and italicize the name of the journal, except those with one word titles. Abbreviate according to the list in the AMA Manual of Style, in Section 14. You can also try the following sources:
 - The NLM Journal Catalog: <https://www.ncbi.nlm.nih.gov/nlmcatalog/journals>
 - Ulrich's Periodicals Directory (<https://guides.lib.uwo.ca/az.php?a=u-U>). Search by journal title or keywords and click the link for more information. Abbreviations are located in the "Additional Title Details" section under "MEDLINE Abbreviation."
- When listing page numbers, do not omit digits from inclusive page numbers (i.e. 1025-1029, not 1025-9).
- See the *American Medical Association Manual of Style (10th Edition)* for additional assistance with paraphrasing, titles, inserting tables, and all other formatting concerns.
