London

SW1H 0EU

07 March 2023

Dear Clive,

First, I would like to express our sincere apologies for the confusion caused by a recent letter from the Department of Levelling Up Housing and Communities regarding the Long term Funding of Adult Social Care Report. This was due to an error by officials in the Department of Health and Social Care.

We would also like to apologise for the continued delay in responding to this report. The government is planning to publish a plan for adult social care system reform shortly. This will set out how we will build on the progress so far to implement the vision for adult social care set out in the People at the Heart of Care white paper. We will be able to provide the committee with a more accurate response following the publication of this document.

I would like to assure you that we take the issues raised in the report extremely seriously. In order to ensure we provide the best response possible to the report, we are working on it in tandem with the plan for reform and intend to issue it as soon as possible.

Yours sincerely,

HELEN WHATELY
