
Software Engineer Cover letter with No Experience Example

Dear Hiring Manager,

As a recent Computer Science graduate from ABC University, I am excited about the opportunity to begin my career as a Software Engineer at XYZ Company. My academic training and internship experience have provided me with a strong foundation in programming, problem-solving, and software development methodologies.

During my internship at DEF Software, I participated in the development of a mobile application, where I gained hands-on experience with languages such as Java and Python. Although I am a fresher, my ability to learn quickly, adapt, and work in a team environment will enable me to contribute effectively to your software development projects.

Thank you for considering my application. I am eager to further discuss how I can contribute to your team.

Sincerely,

[Your Name]
