

# Action Research Proposal for Reading Comprehension

---

## Title Page

**Title:** Enhancing Reading Comprehension Skills through Interactive Strategies

**Researcher:** [Your Name]

**Institution:** [Your Institution Name]

**Date of Submission:** [Insert Date]

## Abstract

This proposal aims to improve students' reading comprehension skills by implementing interactive teaching strategies. The research will evaluate the effectiveness of techniques such as guided reading, questioning, and group discussions. A mixed-methods approach will be utilized, collecting data through assessments, observations, and student feedback to analyze the impact of these strategies.

## Introduction

Reading comprehension is a fundamental skill that significantly influences academic success across all subjects. However, many students struggle to extract meaning from texts due to limited engagement or ineffective strategies. This research aims to explore and implement innovative approaches to strengthen students' ability to understand and analyze written material effectively.

## Research Problem/Statement of the Problem

Many students face difficulties in understanding and interpreting texts, which impacts their academic performance. This research seeks to address these challenges by identifying the gaps in current teaching methods and introducing targeted strategies to enhance reading comprehension.

## Objectives of the Study

The study's primary objectives are to:

- Identify barriers to effective reading comprehension among students.
- Develop and implement interactive strategies to improve comprehension skills.
- Evaluate the impact of these strategies on students' academic performance.

## **Literature Review**

Research highlights that interactive techniques such as guided reading, peer discussions, and questioning significantly improve reading comprehension. These strategies encourage critical thinking and active engagement with texts. While these methods have shown promise, more research is needed to understand their effectiveness in different classroom contexts.

## **Methodology**

The study will adopt a mixed-methods approach. Baseline data will be collected through reading assessments and student surveys. Strategies such as guided reading sessions, comprehension questioning, and group discussions will be introduced. Data will be gathered through observations, post-intervention assessments, and feedback from students and teachers.

## **Action Plan**

The action plan includes:

- Conducting initial assessments to identify students' comprehension levels.
  - Implementing interactive strategies such as questioning, group discussions, and guided reading.
  - Monitoring progress through regular assessments and observations.
  - Collecting and analyzing feedback to refine the strategies as needed.
- The research will be conducted over a six-week period, with weekly progress evaluations.

## **Expected Outcomes**

The study expects to see significant improvement in students' ability to understand and analyze texts. Students will demonstrate higher engagement with reading activities and improved academic performance across subjects.

## **Budget (if applicable)**

The budget will cover the cost of resources such as reading materials, assessment tools, and training sessions for teachers. The estimated cost is [Insert Budget Amount].

## **References**

The references section will include scholarly articles, studies, and books that support the proposed methods and strategies for improving reading comprehension.

## **Appendices**

Appendices will include sample reading passages, comprehension questions, observation templates, and assessment tools used in the study.
