

Simple Event Report

Event Name: Community Health Fair 2025

Date: October 12, 2025

Location: Community Center, Main Hall

Purpose of the Event:

The Community Health Fair was organized to raise health awareness and provide free medical screenings to the local population. The event aimed to connect residents with healthcare resources and educate them about maintaining a healthy lifestyle.

Event Activities:

- **Free Health Screenings:** Blood pressure, cholesterol, and diabetes screenings were offered to attendees.
- **Educational Workshops:** Sessions on nutrition, exercise, and mental health were conducted by healthcare professionals.
- **Information Booths:** Local health clinics and hospitals set up booths to distribute informational brochures and consult with attendees one-on-one.

Attendance:

Approximately 200 community members attended the fair, along with 20 healthcare professionals and volunteers who manned the booths and conducted screenings.

Outcomes:

- Over 150 health screenings were performed, identifying 20 individuals who were advised to seek further medical consultation.

- Educational sessions were well-received, with particularly high engagement in the mental health workshop.
- Many attendees expressed appreciation for the resources provided and requested more frequent health events.

Observations and Recommendations:

- The location was accessible, but additional signage might have directed more foot traffic to the fair.
- Considering the high interest in mental health resources, future events should include more sessions on this topic.
- Feedback suggested that more interactive activities could enhance engagement, such as fitness demonstrations or healthy cooking classes.

Conclusion:

The Community Health Fair 2025 successfully met its objectives of increasing health awareness and providing valuable medical screenings to the community. The feedback received will be instrumental in planning future events that better cater to community needs.
